ABOUT US

'DEDICATED PROFESSIONALS WITH RESPONSIBILITIES FOR YOUR COMPLETE SATISFACTION'

OUR STRENGTH

Most of the software projects fail due to the incompetence of (1) relevant project evaluation and planning processes, and (2) inefficient communication management. We are **Professional Project Management specialist** experienced in top-level business and web solution development. We use special proprietary software for managing project activities and communication process. Therefore **you always can actively stay connected** with the whole process, and can instantly identify the deviation before it is too late. Is not it amazing to have such kind of unique direct cooperativity and professionalism!

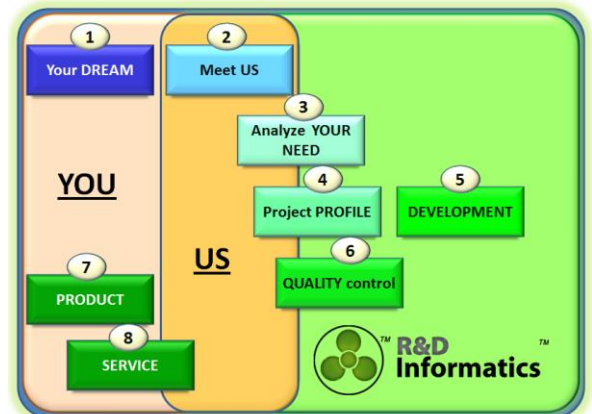

OUR MARKET

We develop products for **international** business solution, as well as for **local** market. Our products are **praised by top executives** of big corporate houses in Japan and North America – that's enviable! Is not it!

OUR PROCESS

Unlike other company, we **do not leave** our partners in trouble. We follow **close-loop relationship** so that you never feel you are an outsider. Our **responsibility** starts as soon as you contact us, and **never ends** until the retirement of the product.

APPLICATION DEVELOPMENT

WE BUILD YOUR DREAM

Have a dream for software! Just contact us, and stay assured that **you** can have the dream in reality with **great satisfaction!**
Yes, that's our challenge!!

WE PROVIDE RIGHT PRODUCT

The **biggest challenge** in application development is to deliver the right product. One may say we try Agile or Scrum practice but everything is useless unless it is the **desired product**. We use highly efficient proprietary management tool to understand **your right need** therefore are able to deliver the right product to **see you happy!**

WE DELIVER SECURED

Most of the software companies make a big mistake – they don't care about the secured testing and delivery method of your valuable software. So the **product security** can be seriously compromised – just imagine **your critical application** is already hacked before **you started** using it! We are partnered with one of **the world's best secured server 'Firehost'** therefore the **product never exposed** to insecure environment even during the testing phase. **We ensure – 'your product is only yours'.**

REPRESENTATIVE CREATION

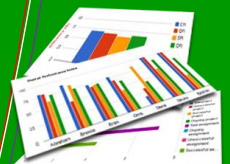

www.mymanager.co

MyManager™ is unique software for highly efficient management of business projects and relevant activities. It is a complete enterprise solution for any size of company to manage their activities in real time, and improve the productivity. **We have built** this versatile and user friendly highly dynamic software for a **North American company** based on their patent pending methodology. The software has **already earned very good respect** from top level business executives in international business expo held in Tokyo, Japan from May8 to 10, 2013. **You can also try this very beneficial software free** of cost to improve your business success and to get a clear idea about our quality in relevant field – **we assure you will be amazed!** We are also providing world-wide customer support for this software.

R&D-LabMan™ is the first of a kind one-stop laboratory and research project management software. **We have developed** this online-based highly dynamic software in 2012 for a **North American company**. Currently we are working to release the upgraded version of this unique software. **You can check the free trial version** to be confident about our quality in complex application development.

WEBSITE DEVELOPMENT

WE BUILD YOUR BRAND IMAGE

People get first impression of **your business** from **your webpage**. As a professional business management expert, we know how critical to build a brand image of your business. We provide top-level business expert's consultation for designing your storefront – yes, we believe **your website is your storefront**. We can help to establish **your storefront as a brand!**

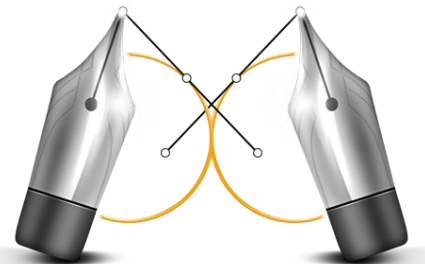

STAND-ALONE DESIGN

On average a person takes only 7 sec. to decide whether to stay on that website or close it. So it is very critical to keep your web-visitor interested to stay on your website to get effective business. We provide original vivid design, graphics, and images so that **your website can stand-alone** to attract visitors to produce effective business. In fact, web analytics data showed that the **average standing time per visitor for our designed websites is more than 3 min; compare to the universal average of 7 sec, which is absolutely amazing.**

EFFECTIVE & QUALITY CONTENT

Content is the materials that **create value** to the website visitors, which ultimately generates effective business. We have professional business experts so that you can get top-level expert service to **build effective content for your dream website**. We have also **North American English speaker**, so that **you can stay assured of the quality of content of your website.**

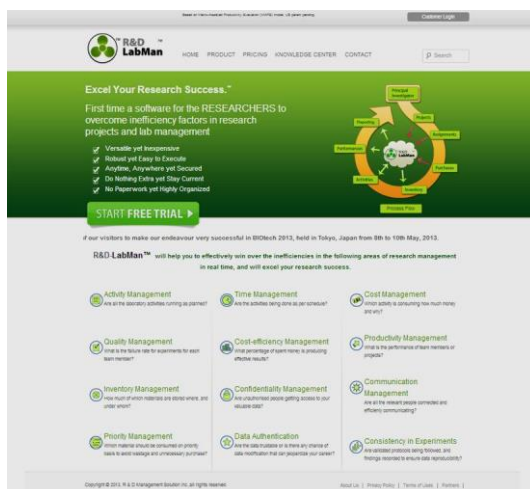

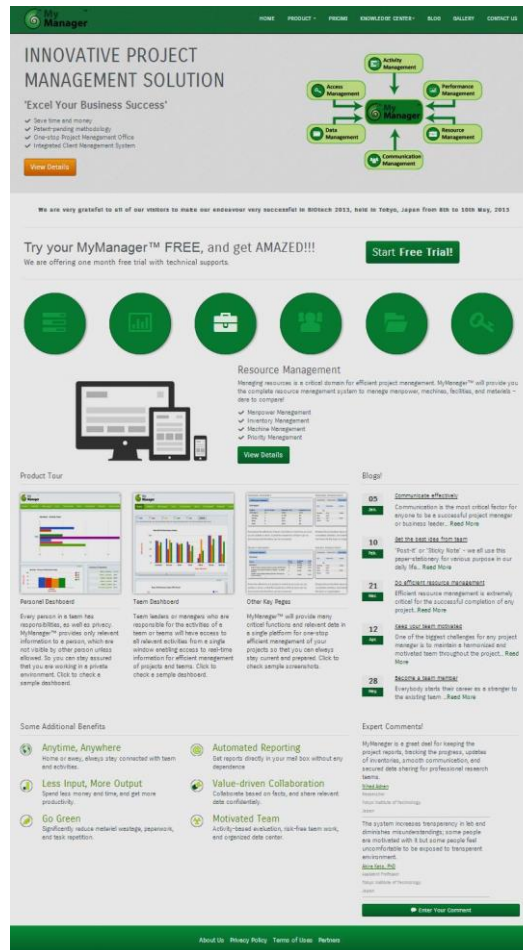

REPRESENTATIVE CREATION

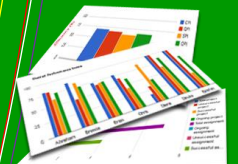

www.mymanager.co

This website is the storefront for the unique business management software MyManager™. This is developed with the latest bootstrap technology, and has total 27 pages, with lots of graphics and images. There are also real-time comment sections for multiple sections for lively experience of visitors. It has lots of flash contents as well to provide fluid experience to the visitor. The site also has dynamic resizing capacity to fit different size display. The online load test reveals the score 84 out of 100, with average loading time of 11 sec. For such kind of site with huge contents the score of load test is very good. The site has got average standing time per traffic is more than 3 min, which is extremely good compare with the global average of 7 sec, indicates the attractiveness of the site design and content. This example is a clear evidence of our quality of work not only in technology also in content design and development for your business success.

www.rndlabman.com

This site is created in **wordpress** with **complete control panel**. This is the storefront for laboratory and research project management software R&D-LabMan™. The **load test score** was **91 out of 100**. For such a site with **SSL certificate-enabled** this score is excellent. The average loading time was only 5 sec. Don't you think it is enviable!
